

Hibernation Package

Rutland House Exotic department are offering a special offer to all of our tortoise clients.

Hibernation is an important part of development and growth for most Mediterranean tortoises, but it is vital to make sure that they are fit and healthy before they are to go to sleep for a period of time.

We are able to offer a Consultation with one of our experienced Exotics Vets who will be able to measure and weigh your tortoise.

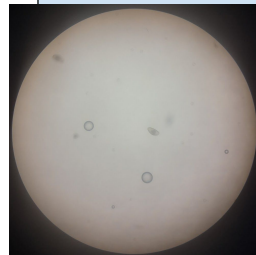

We will then admit your tortoise to the hospital, give them a nice warm bath and take two x-ray views to check for eggs, stones and any other abnormalities.

If your tortoise passes any motions or if you bring in a faecal sample, we will check them for worms and if present then we will give them some worming treatment.

We are able to offer this package for £149.50, this is a massive saving of £131.50

If your tortoise is fit and healthy we will give you information and advice on the best way to hibernate and wake your tortoise.

If we find any reasons not to hibernate we will advise on how to keep them awake during the Autumn/Winter and help get them fit and healthy to hibernate the following year.
